**Farabi Technology's Dubai Office Wins the Microsoft Business Process and Integration Competency Award**

---

**Dubai, February 22, 2006** – Farabi Technology Middle East announced today that it has been awarded the Microsoft prestigious Business Process and Integration Competency award during the Microsoft Gulf Partner Summit.

The Business Process and Integration Competency award recognizes the best-of-breed partners in the region and was presented by Mr. Orlando Ayala, Senior Vice-President of Microsoft's Small and Midmarket Solutions & Partners group.

“We are very excited about the level of recognition and confidence that this award represents” said Bachar Kassar, General Manager of Farabi Technology M.E. “We are firm believers that the Microsoft BizTalk Server is a well positioned solution to address today’s corporate integration needs, and we are committed for the continued excellence in the service and added value we provide”.

Farabi Technology M.E. has been providing integration expertise on the Microsoft platform to private and public enterprises in the Middle East, North Africa and South-west Asia. Its close partnership with Microsoft enabled it to offer its clients significant value, particularly on the Microsoft BizTalk and Host Integration Servers.

“This award recognizes Farabi’s high level of expertise and professionalism and the dedication with which the company has worked to help customers get the most from their IT solutions.

## Farabi receives the Microsoft Business Process and Integration Competency Award

---

Microsoft solutions are designed to meet customer requirements but we still rely on our partners to provide essential services to ensure that the customer gains true value. Microsoft Gulf would like to congratulate Farabi on this award, and we look forward to working with them in future,” said Charbel Fakhoury, General Manager, Microsoft Gulf.

In addition to the services around the Microsoft Servers, Farabi Technology M.E. has been providing products and services that complement the Microsoft BizTalk and Host Integration Servers in the Legacy Access and Integration space.

###

### **About Farabi Technology**

Farabi Technology Corp. is a provider of *Host Access* and *Host Integration* solutions that enable Enterprises to quickly and easily implement their e-business and Web strategies. Farabi was established in 1987 to provide Mainframe connectivity products. It acquired DCA's Midrange Connectivity division in 1991. Building on its state-of-the-art e-business platform, **HostFront**, the company develops products and turnkey solutions that cater to Legacy Integration, remote access and mobile business needs. Farabi Technology Middle East is an international office of Canadian-based Farabi Technology Corp., and provides sales, support, and professional services to the region. Its proven expertise in the Host Integration environment and impressive record of accomplishment of integrating and implementing connectivity solutions in high-transaction environments make Farabi a key software provider to the governmental, airline, banking, manufacturing, and finance industries as well as the public sector.
